

## PASSWORDS at HASD

You cannot change your password off the HASD internal network. This is for security reasons, as well as, how passwords are synchronized for many of our systems

You cannot reset your skyward password in skyward. (Changing it there does nothing, nor can you have someone look in Skyward for your password).

You cannot reset your @huntsd.org email password in google gmail. It will simply send you to our web page.

To change your password you can visit our web page [www.huntsd.org](http://www.huntsd.org) (on our school network) and click the HASD Change Password link.

Things to know:

1. If you know your current password you can use the link to change it
2. If you DO NOT know your current password and you have already set up your challenge questions you can answer the questions and changes your current password
3. **Otherwise you will have to use the helpdesk system to get it reset.**

The way this system works –

Your master password is on our Windows Active Directory server. The web page link to change your HASD password resets the Windows Active Directory Password for your account. When that happens the following linked systems automatically change:

1. Moodle
2. Gmail for @huntsd.org email accounts
3. Destiny Library
4. Computer access at the school
5. Clever and all the systems that you access via Clever (like Study Island)

These are the only accounts affected by this....
